Short summary of Roblox early history

The beta version of Roblox was created by co-founders David Baszucki and Erik Cassel in 2004 under the name Dyna-Blocks.[46] Baszucki started testing the first demos that year.[47] In 2005, the company changed its name to Roblox,[47] and it officially launched on September 1, 2006.[1] In March 2007, Roblox became compliant with COPPA, with the addition of safe chat, a change that limited the communication ability of users under the age of 13 by restricting them to selecting predefined messages from a menu.[48] In August, Roblox applied server improvements and released a premium membership service named "Builders Club". [49] This paid membership feature was rebranded as Roblox Premium in September 2019.[50]

What is Roblox

Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and as a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic.
